Series Specifications:

Nominal Wavelength	589 nm
Output Type	Pulsed (720 Hz)
Laser Source Type	DPSS

Overview:

The new 589 nm bright yellow pointer from Laserglow is noticeably brighter and more "yellow" than the original 593.5 nm Rigel series yellow lasers. (The regular Rigel is often described as "amber-yellow".) This wavelength is closer to the middle of the spectrum, making it brighter to the human eye and more suitable for presentations on bright projection screens or long-range pointing applications. This is really the brightest and "yellowest" yellow pointer on the market!
