Series Specifications:

Nominal Wavelength	0 nm
Output Type	
Laser Source Type	

Overview:

These tabletop tripods are compact, adjustable, and perfect for stable hands-free operation of a battery-operated laser. The standard 1/4-20 threading (the same as any other camera tripod) allows for attachment to our GlowMount tripod adapter which is suitable for the Galileo, Aries, Hercules, Orion, Vega, or Scorpius lasers. It even attaches directly to any of our Brightline Series alignment lasers. The tripods fold up for easy storage or travel, and when fully extended they offer a stable platform so your laser beam will stay fixed on target at any range.

Key Features:

- Adjustable height and stance.
- Tested for balance and stability with all of our portable lasers.
- Folds up for storage or travel, much smaller than a conventional camera tripod.

Use with the [GlowMount Tripod Adapter](#) (for portable lasers), or attach directly to any Brightline Series alignment laser.

Specifications:

This spec sheet has been generated specifically for part number ATP006XXX, per your request, and data for the entire series is also displayed for your reference. The specs which are specific to ATP006XXX have been highlighted below in **red + bold**.

CW: All specifications are based on performance at full output power and after the specified warmup period. Output characteristics may change if the laser is run at a different power level.

Q-Switched: Specifications are based on the laser pulsing at the specified design frequency. Output characteristics may change if the laser is run at a different frequency.

Accessories:

The most popular accessories for model ATP006XXX are shown below. For additional details regarding these or other accessories please see our website or contact us directly.
