CW: All specifications are based on performance at full output power and after the specified warmup period. Output characteristics may change if the laser is run at a different power level.

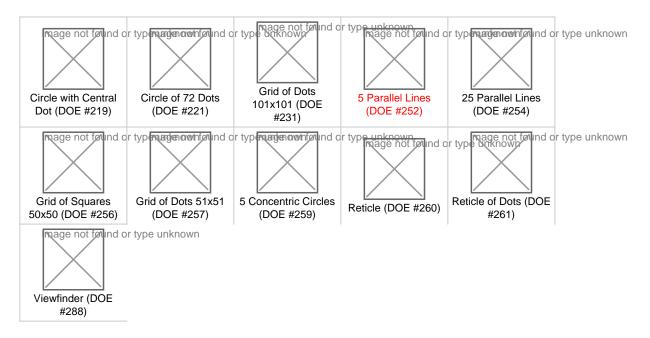

Q-Switched: Specifications are based on the laser pulsing at the specified design frequency. Output characteristics may change if the laser is run at a different frequency.

Power Supply Options:

The Brightline Premium series of alignment lasers accept direct DC input of 3 to 6 VDC. The power connector is a 5.5 mm OD, 2.1 mm ID DC Barrel Jack (center pole positive), but non-waterproof connectors are compatible. If you do not want to provide DC current directly, we recommend that you use our AC power supply. The model number for the standard North American AC Power Supply is ABF05AWXX and you can find complete details here: www.laserglow.com/ABF.

Projection Types:

The following projection types are available for this laser series.

Regulatory Classification:

The model you have selected (BOQ005252) requires the following safety label(s):

Dimensional Drawing - Laser Form Factor: B9: Aperture Remove front cap to access focus adjustment Focus Adjustment Locking Set Screw Brightline Premium properly of Lasergiow Technologies. Any reproduction properly of Lasergiow Technologies.
