Series Specifications:

Nominal Wavelength	532 nm
Output Type	Q-Switched
Laser Source Type	DPSS

Overview:

The LQS-0532 Series of Diode-Pumped Solid-State (DPSS) Q-Switched Lasers are ideal for applications requiring a very high peak power or short pulse duration at 532 nm.

These lasers are commonly used for fluorescence excitation, Raman spectroscopy, material processing, and a broad range of other applications. The driver is available as a plug-and-play benchtop system or an O.E.M. component designed for system integration.

Key Features:

- Pulse energy of 1 uJ 30 uJ
- Pulse repetition rate of 1 Hz 4 kHz
- Pulse duration of 10 ns
- · Air cooled
- Runs on standard AC power (85 264 V, 47 63 Hz)
- 10,000 hour maintenance-free operating life (Expected)
- FDA/CDRH compliant Class IV enclosure

Package Includes:

- · Laser Head
- Driver/Power Supply
- Power Cable
- BNC Connector (LabSpec models only)
- Keys, Safety Interlock
- Hard-shell Carrying Case

Specifications:

This spec sheet has been generated specifically for part number Q530031SX, per your request, and data for the entire series is also displayed for your reference. The specs which are specific to Q530031SX have been highlighted below in red + bold.

CW: All specifications are based on performance at full output power and after the specified warmup period. Output characteristics may change if the laser is run at a different power level.

Q-Switched: Specifications are based on the laser pulsing at the specified design frequency. Output characteristics may change if the laser is run at a

different frequency.

Specifications Page 2:

This spec sheet has been generated specifically for part number Q530031SX, per your request, and data for the entire series is also displayed for your reference. The specs which are specific to Q530031SX have been highlighted below in red + bold.

Laser Form Factor		
Beam Height from Base Plate (mm)	24.8	29
Dimensions of Product or Laser Head (mm)	140.8 (l) x 73 (w) x 46.2 (h)	155 (l) x 77 (w) x 60 (h)

CW: All specifications are based on performance at full output power and after the specified warmup period. Output characteristics may change if the laser is run at a different power level.

Q-Switched: Specifications are based on the laser pulsing at the specified design frequency. Output characteristics may change if the laser is run at a different frequency.

Power Supply Options:

These lasers are available with several different power supply options. The model that you have selected is highlighted below, and any other options are shown for easy reference.

	Power Supply Type:	SM	SH
FDA-Compliant Standard	Input Power	85v to 264v	85v to 264v
	Power Supply Weight (kg)	1.2	2.3
	Dimensions (mm)	133 (l) x 130 (w) x 65 (h)	238 (l) x 146 (w) x 102 (h)

*Power supply may not be exactly as shown, see dimensional drawings on next 2 pages. *Dimensions for fiber-integrated (I_) include laser head packaged inside.

Regulatory Classification:

The model you have selected (Q530031SX) requires the following safety label(s):

Dimensional Drawing - Power Supply Form Factor: SM:

Accessories:

The most popular accessories for model Q530031SX are shown below. For additional details regarding these or other accessories please see our website or contact us directly.
